

JOSE SANCHEZ ABREU

This former student is my deceased uncle, my mother's brother. He attended for only one year 1940-41 graduating that year. This former student is my deceased uncle, my mother's brother. He attended for only one year 1940-41 graduating that year. I have attached his photo from the 1941 yearbook which a friend sent me.

His paternal grandmother was the famous "monkey lady", Rosalia Abreu, internationally known for her large collection of monkeys and apes right on her property, Quinta Palatino or Finca de los Monos, a castle like structure near the covered sports stadium. I have attached a

Google Earth image of the property. It is now the Havana headquarters for Los Pioneros.

He was of mixed Cuban and French ancestry, only living in Cuba in order for his father to escape the war in Europe.

Paul del Junco
